Elder Move Inc., Certified in Covid 19 Prevention and Safely, keeping seniors safe during their move. Relocation with comfort and ease.

The Covid 19 pandemic has families and communities scared of essential relocations NEEDING to take place to improve the health and safety of seniors.

- The acquisition of the Health Canada approved EnviroNize Anolyte fogger for disinfection
- COVID19 Certification in the Prevention & Safety Excellence for Senior Move Managers, NASMM (National Association of Senior Move Managers),

EDMONTON, AB. Dec 28, 2020

Health Canada has approved the use of the EnviroNize Anolyte for disinfection in hospitals and healthcare facilities. As of Dec. 28 2020, Elder Move Inc. will be providing this enhanced level of prevention against COVID19 to its clients and senior communities. Use of this equipment, along with proper personal protective equipment (PPE), makes Elder Move Inc. the first Senior Move Manager to offer this beneficial service to its clients.

“Fogging” is the method of application for disinfection using a non-toxic solution which generates a fog or mist of ultra-low volume droplets. In this process pathogens are destroyed. Treatment will be completed prior to belongings being moved out of the original location and for a second time in the new suite. This double fogging method ensures that items, including cardboard, are being disinfected prior to entering the new community facility.

Elder Move Inc. staff follow the proper use of PPE, including wearing one time use medical masks. A daily questionnaire and temperatures are taken. Elder Move Inc. believes it is important to keep both residents and staff safe during relocation by following Alberta Health Services enforced protocol.

Relocation, at the best of times, is very stressful. Let the Covid 19 trained staff at Elder Move Inc. help and keep you safe. Visit www.eldermove.ca for more information. Relocation with comfort and ease.

Elder Move Inc. is offering this enhanced level of protection against COVID19. Elder Move Inc. does NOT guarantee 100% free COVID19 transmission.
